- Built a reporting tool in Excel that gave the team a clear weekly view of open orders.
- Cleaned customer files with Python and fixed the records that did not match.
- Presented monthly findings to the managers and wrote the follow-up notes.
- Helped train 6 new hires on the order system during the busy season.
- Tracked weekly numbers in a shared sheet so nobody had to ask for updates.

Analyst 3 | Northwind Demo Co | 2022 - 2023

- Built a reporting tool in Excel that gave the team a clear weekly view of open orders.
- Cleaned customer files with Python and fixed the records that did not match.
- Presented monthly findings to the managers and wrote the follow-up notes.
- Helped train 6 new hires on the order system during the busy season.
- Tracked weekly numbers in a shared sheet so nobody had to ask for updates.

Analyst 4 | Northwind Demo Co | 2023 - 2024

- Built a reporting tool in Excel that gave the team a clear weekly view of open orders.
- Cleaned customer files with Python and fixed the records that did not match.
- Presented monthly findings to the managers and wrote the follow-up notes.
- Helped train 6 new hires on the order system during the busy season.
- Tracked weekly numbers in a shared sheet so nobody had to ask for updates.

Analyst 5 | Northwind Demo Co | 2024 - 2025

- Built a reporting tool in Excel that gave the team a clear weekly view of open orders.
- Cleaned customer files with Python and fixed the records that did not match.
- Presented monthly findings to the managers and wrote the follow-up notes.
- Helped train 6 new hires on the order system during the busy season.
- Tracked weekly numbers in a shared sheet so nobody had to ask for updates.

Analyst 6 | Northwind Demo Co | 2025 - 2026

- Built a reporting tool in Excel that gave the team a clear weekly view of open orders.
- Cleaned customer files with Python and fixed the records that did not match.
- Presented monthly findings to the managers and wrote the follow-up notes.
- Helped train 6 new hires on the order system during the busy season.
- Tracked weekly numbers in a shared sheet so nobody had to ask for updates.

Analyst 7 | Northwind Demo Co | 2026 - 2027

- Built a reporting tool in Excel that gave the team a clear weekly view of open orders.
- Cleaned customer files with Python and fixed the records that did not match.
- Presented monthly findings to the managers and wrote the follow-up notes.
- Helped train 6 new hires on the order system during the busy season.
- Tracked weekly numbers in a shared sheet so nobody had to ask for updates.

Analyst 8 | Northwind Demo Co | 2027 - 2028

- Built a reporting tool in Excel that gave the team a clear weekly view of open orders.

- Cleaned customer files with Python and fixed the records that did not match.
- Presented monthly findings to the managers and wrote the follow-up notes.
- Helped train 6 new hires on the order system during the busy season.
- Tracked weekly numbers in a shared sheet so nobody had to ask for updates.

EXPERIENCE

Data Intern | Brightpath Logistics | Jun 2025 - Aug 2025

- Built a weekly sales dashboard in Excel that cut manual reporting time by 5 hours and gave the whole team one clear view of late shipments by carrier.
- Cleaned and merged 3 shipment data sources with Python to fix duplicate records.
- Presented route delay findings to a team of 8 and helped choose two new carriers.

Student Assistant | UT Library | Sep 2024 - May 2025

- Helped 40 students a week find research sources and book study rooms.
- Wrote a short guide for the checkout desk that new staff still use.

PROJECTS

Campus Bike Share Analysis | Python, SQL | Spring 2025

- Queried 12,000 trip records in SQL to find the busiest stations by hour.
- Made charts of ride patterns and shared the results with the student council.

SKILLS

Python, SQL, Excel, Git, Tableau
